STANDARDS AND SPECIFICATIONS FOR BUILDING MATERIALS

Listed herein are Commercial Standards, Simplified Practice Recommendations, and Federal Specifications for various kinds of building materials.

Copies of the printed Commercial Standards and Simplified Practice Recommendations may be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. Copies of several of the publications not yet printed are available, without cost, in mimeograph form.

All of the Federal Specifications have recently been, or are now being, revised. They are listed herein under both their new classification symbols and their old numerical designations.

For many of these specifications there have been compiled lists of sources of supply of material guaranteed to comply with the specification requirements. These lists can be obtained without cost from the Bureau of Standards, Washington, D. C.

Copies of the Federal specifications which have been printed may be purchased from the Superintendent of Documents at 5 cents each with the exception of FF-H-101 (30 cents); SS-C-191 (10 cents) and WW-P-541 (15 cents). Information concerning copies of Federal Specifications not yet printed can be obtained from the Federal Specifications Board, Bureau of Standards, Washington, D. C.

An index of all current Federal Specifications, indicating the status of the specifications and showing the price of printed copies, will shortly be published as Section IV of the Federal Standard Stock Catalogue. Copies of this index may be purchased from the Superintendent of Documents, possibly at 10 cents each - the price of the earlier edition.

COMMERCIAL STANDARDS FOR BUILDING MATERIALS

Below are listed commercial standards for various kinds of building materials. Lists of manufacturers willing to supply material guaranteed by them to comply with all of these standards have been compiled by the Bureau of Standards.
